EXCLUSIVE SURFACES

THE EXCLUSIVITY VISION

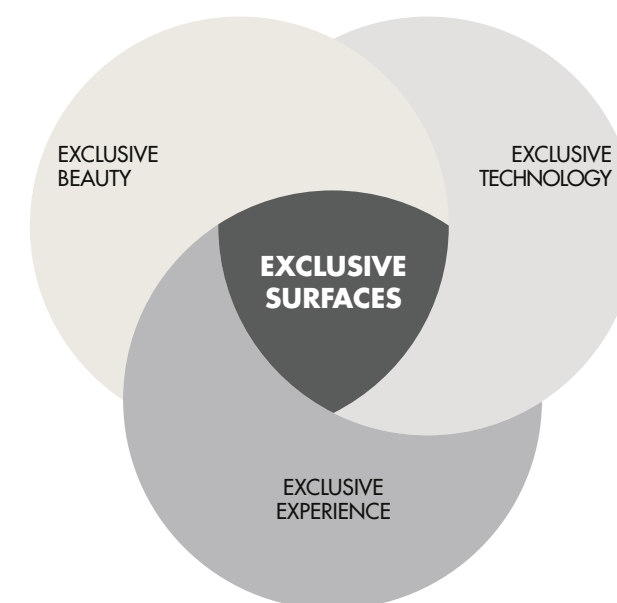

Pour Cotto d'Este, l'exclusivité est l'art de créer des surfaces rares et d'auteur, conçues pour préserver intacte leur valeur. C'est un idéal de beauté distinctive qui transcende les modes et évolue grâce à une innovation constante : celle de technologies d'avant-garde capables d'élever la matière céramique et de la projeter vers de nouvelles et infinies possibilités d'application.

Depuis plus de trente ans, cette vision se traduit par des surfaces qui dépassent le simple concept de revêtement, en fusionnant rigueur esthétique, performances d'excellence et liberté de conception absolue. Car pour Cotto d'Este, Exclusive n'est pas seulement un aboutissement, mais une expérience : transformer l'espace en une scénographie de l'habiter, où la richesse de la gamme devient l'outil concret pour donner vie à chaque environnement.

For Cotto d'Este, exclusivity is the art of creating rare, signature surfaces, designed to preserve their excellence intact over time. It is an ideal of distinctive beauty that transcends fashion and evolves through constant innovation: that of technologies capable of elevating ceramic materials and projecting them towards new, infinite application possibilities.

For over thirty years, we have translated this vision into surfaces that redefine the concept of wall coverings, combining cutting-edge performance with absolute design freedom.

Because for Cotto d'Este, Exclusive is not just a goal, but an experience: it is about transforming space into a living scenography, where the richness of the range becomes the tangible tool to bring every environment to life.

THE ARCHITECTURE OF EXCLUSIVITY

Exclusive surfaces: where Beauty, Technology and Experience become Excellence

THE RANGE

L'expérience d'habiter des espaces immersifs grâce aux surfaces Cotto d'Este naît d'une gamme profonde et structurée, rendue possible par l'intégration de technologies complémentaires. Plus qu'un simple catalogue de produits, il s'agit d'un système de conception complet qui associe les grandes dalles fines Kerlite, les surfaces haute performance en 14 mm et les propositions premium en 9 mm et 20 mm. Une architecture de solutions dans laquelle épaisseurs, formats et finitions dialoguent entre eux pour offrir des réponses exclusives, performantes et évoluées sur le plan du projet. Une gamme pensée pour durer et évoluer dans le temps, soutenue par une innovation constante tournée vers l'avenir.

The experience of inhabiting engaging spaces through Cotto d'Este surfaces stems from a deep, structured range made possible by the integration of complementary technologies. Not merely a product catalogue, but a complete design system that brings together thin large-format Kerlite slabs, high-performance 14 mm surfaces and premium 9 mm and 20 mm solutions. An architecture of solutions where thicknesses, formats and finishes dialogue with one another to deliver exclusive, high-performance and design-driven answers. A range conceived to endure and evolve over time, supported by constant innovation and a forward-looking vision.

COTTOD'ESTE

EXCLUSIVE SURFACES

20 MM

Dans le langage de l'architecture contemporaine, l'épaisseur devient une véritable matière de projet. Les 20 mm de Cotto d'Este ont été conçus pour offrir une solution céramique d'une solidité exceptionnelle, pensée pour interpréter avec autorité les espaces extérieurs et les applications les plus avancées. Réalisés en grands formats, les produits en épaisseur 20 mm amplifient la force expressive des surfaces Cotto d'Este. Pierres, ciments et matières naturelles prennent forme à travers une riche gamme d'interprétations esthétiques, capables d'offrir de multiples solutions de conception. Chaque surface est développée avec une attention extrême portée aux détails, fruit d'un processus de recherche et de production qui place au cœur la qualité, la profondeur matérielle et le raffinement visuel.

La variété des surfaces s'accompagne d'une esthétique d'un grand équilibre, où textures, graphismes et couleurs dialoguent pour restituer une beauté authentique et durable, capable de valoriser l'architecture au fil du temps.

Pour confirmer cette excellence, **tous les produits Cotto d'Este en épaisseur 20 mm sont couverts par une garantie de 20 ans et répondent aux normes les plus élevées en matière de sécurité pour la qualité de l'air intérieur, certifiées par la classe française F+.**

Avec l'épaisseur 20 mm, Cotto d'Este exprime une vision de la céramique où esthétique, soin de production et fiabilité se fondent dans un matériau conçu pour durer et accompagner l'architecture dans le temps.

In the language of contemporary architecture, thickness becomes a design material. The 20 mm thickness by Cotto d'Este was created to offer an exceptionally solid ceramic solution, designed to interpret outdoor spaces and the most advanced applications with authority.

Produced in large formats, the 20 mm products enhance the expressive power of Cotto d'Este surfaces. Stones, cements, and natural materials take shape through a rich range of aesthetic interpretations, capable of offering multiple design solutions. Each surface is developed with meticulous attention to detail, the result of a research and production process that places quality, material depth, and visual refinement at its core.

The variety of surfaces is combined with a highly balanced aesthetic, where textures, graphics, and colors interact to deliver an authentic and lasting beauty, capable of enhancing architecture over time.

*Confirming this excellence, **all Cotto d'Este products in the 20 mm thickness are covered by a 20-year warranty and meet the highest standards for indoor air quality safety, certified by the French F+ class.***

With the 20 mm thickness, Cotto d'Este expresses a vision of ceramics in which aesthetics, manufacturing care, and reliability merge into a material designed to last and to accompany architecture over time.

SLATY Surface

Rappelle la surface de l'ardoise clivée, caractérisée par une rugosité distinctive qui en exalte l'aspect naturel et maximise ses performances antidérapantes (R11C). Les caractéristiques de la surface et l'épaisseur majorée de 20 mm rendent ce matériau idéal pour des contextes outdoor de prestige, où les meilleures performances techniques doivent s'accompagner des plus hauts standards esthétiques.

This finish recalls the surface of slate, which features a characteristic ruggedness that highlights the natural appearance and maximises the product's anti-slip performance (R11C).

The surface characteristics and increased thickness (20 mm) make this the perfect material for high-end outdoor contexts, in which the best technical performance must be accompanied by the highest aesthetic standards.

TOUGH Surface

Destinée aux revêtements de sol outdoor en épaisseur 20 mm, Tough est une surface à la structure bouchardée, essentiellement dépourvue de reflets.

Son relief ondulé lui confère un aspect matériel très expressif, tandis que sa rugosité a été soigneusement calibrée pour garantir d'excellentes propriétés antidérapantes (R11-C), sans pour autant compromettre la facilité de nettoyage.

Designed for outdoor flooring with a thickness of 20 mm, Tough is a rugged surface with virtually no shine.

Its wave-like pattern gives it a vividly tactile appearance, while its roughness has been carefully calibrated to ensure outstanding slip resistance (R11-C), without making it difficult to clean.

SLATY Surface

Inspirée de l'ardoise clivée, cette finition à la rugosité marquée maximise la résistance au glissement (R11).

Son aspect naturel, associé à l'épaisseur de 20 mm, rend cette surface destinée aux revêtements de sol outdoor à la fois suggestive et extrêmement performante.

Inspired by split slate, this finish with a substantial roughness maximises its slip resistance (R11).

The natural look and the 20 mm thickness make this surface intended for outdoor flooring an alluring and, at the same time, a extremely high-performance one.

BOCCIARDATA Surface

Inspirée de l'effet authentique des pierres naturelles, cette surface reproduit avec précision la traditionnelle finition bouchardée, présente dans la plupart des pierres naturelles et particulièrement appréciée en extérieur pour sa capacité à augmenter la résistance au glissement. Au reflet mat et à l'esthétique intense et sculptée, elle conjugue force expressive et performance technique, atteignant un haut niveau d'antidérapance (R11-C), garanti même en conditions de surface mouillée.

Inspired by the authentic look of natural stone, this surface faithfully reproduces the traditional bush-hammered finish, commonly found in many natural stones and particularly appreciated for outdoor applications thanks to its ability to increase slip resistance.

With its matte appearance and intense, sculpted aesthetic, it combines strong visual character with high technical performance, achieving a high slip-resistance rating (R11-C), guaranteed even in wet conditions.

FIAMMATA Surface

Finition inspirée de la surface des pierres naturelles soumises au flammage : la surface est exposée à un jet de flamme vive à très haute température puis immédiatement refroidie à l'eau.

Le choc thermique provoque la dilatation de la pierre et la rugosité caractéristique propre à cette finition.

Finish inspired by the surface of natural stones subjected to flaming: the surface is hit by a jet of open flame at high temperatures and immediately afterwards cooled with water.

The thermal shock causes the expansion of the stone and the consequent roughness typical of this finish.

Surface

Un moule en résine reproduit l'effet du martelage de la surface, une finition présente dans la plupart des pierres naturelles et particulièrement appréciée pour les applications extérieures, car elle augmente sensiblement le niveau de résistance au glissement. Cette surface se caractérise également par un graphisme spécifique qui en souligne la polyvalence et le caractère.

A resin die simulates the effect of bush-hammering, a finish that is offered for nearly all natural stones. It is particularly appreciated for exterior use as the texture increases non-slip propoerties. This surface is also characterized by a different graphic that emphasizes its versatility and personality.

HAMMERED Surface

Cette finition à la structure nettement rugueuse atteint un niveau de résistance au glissement R12-C, idéal pour tout type de revêtement de sol outdoor.

À la texture riche en détails minéraux s'ajoute un maillage dense qui parcourt la surface et en accentue l'attrait matériel ainsi que le sentiment d'authenticité de l'effet pierre.

This finish with a distinctly rough structure achieves a degree of slip resistance of R12-C, ideal for any outdoor flooring.

The texture, rich in mineral details, is combined with a dense pattern that furrows the surface and enhances its material appeal and the sense of authenticity of the stone effect.
